PROFESSIONAL SUMMARY:

More than 3 years of IT experience specializing in DevOps, Cloud Engineering, and Build and Release Management. Proven expertise in automating, building, deploying, managing, and releasing code across various environments. Skilled in maintaining Continuous Integration (CI), Continuous Delivery (CD), and Continuous Deployment (CD) processes in multiple settings, including Development, Testing, Staging, and Production.

Proficient in AWS services like VPC, EC2, EFS, S3, ELB, Auto Scaling Groups (ASG), EBS, RDS, IAM, Route 53, Cloud Watch, Cloud Front, Cloud Trail & EKS. Understands and manages the space between operations and development to quickly deliver code to customers. Has experience with Linux. Brings maturity, enthusiasm, and a drive to learn new technologies along with real world experience

SKILLS:

Version control tools	GIT, GITHUB
Cloud Technologies	AWS, AWS Cli
Build Tools	Maven
Configuration Tools & IAC	Ansible, Terraform
CI and CD Tools	Jenkins
Web/Application Servers	Apache Tomcat
Operating Systems	Linux (RHEL, Ubuntu)
Containerization & Orchestration	Docker, Kubernetes
Monitoring Tools	AWS Cloud Watch,
Virtualization	VMWare and Virtual Box
Arte factory tool	Nexus and J Frog repository

EXPERIENCE:

Hexaware technologies limited | AWS Devops Engineer – JAN 2022 to PRESENT

EDUCATION:

Bachelor of Degree (BCom) Graduation completed from Osmania University in 2021

PROJECT:

Project #1:

Name : McDonalds
Client: McDonalds
Date : Jan 2022 to till date.

About Client: McDonald's is the world's leading global foodservice retailer with over 37,000 locations in over 100 countries. More than 90% of McDonald's restaurants worldwide are owned and operated by independent local businessmen and women. McDonald's & our franchisees employ 1.9 million people worldwide. We serve the world some of its favorite foods - World Famous Fries, Big Mac, Quarter Pounder, Chicken McNuggets and Egg McMuffin.

Roles & Responsibilities:

- Responsible for architecting, designing, implementing and supporting of cloud-based infrastructure and its solutions.
- Experienced in creating multiple VPC's and public, private subnets as per requirement and distributed them as groups into various availability zones of the VPC.
- Created NAT gateways and instances to allow communication from the private instances to the internet.
- Used security groups, network ACL's, internet gateways and route tables to ensure a Secure zone for organization in AWS public cloud.
- Created and configured elastic load balancers and auto scaling groups to distribute the traffic and to have a cost efficient, fault tolerant and highly available environment.
- Created S3 buckets in the AWS environment to store files, sometimes which are required to serve static content for a web application. Configured S3 buckets with various life cycle policies to archive the infrequently accessed data to storage classes based on requirement.
- Possess good knowledge in creating and launching EC2 instances using AMI's of Linux, Ubuntu, RHEL, and Windows and wrote shell scripts to bootstrap instance.
- Used IAM for creating roles, users, groups and implemented MFA to provide additional security to AWS account and its resources.
- Experience in working on Ubuntu Linux and shell commands and ssh configurations and keys
- Written terraform templates to create custom VPC, subnets, NAT to ensure successful deployment of web applications.
- Implemented domain name service (DNS) through route 53 to have highly available and scalable applications.
- Maintained the monitoring and alerting of production and corporate servers using Cloud Watch service.
