Professional Summary

DevOps Engineer with 8 months of experience in cloud infrastructure, CI/CD, and automation. Skilled in AWS services IAM, EC2, S3, EBS, RDS, CloudFormation, CloudWatch, VPC, EKS, Docker, Jenkins, GitHub, and Shell scripting for automating tasks and streamlining deployments. Experienced in managing with Docker and Kubernetes (EKS basic), deploying applications using Infrastructure as Code (IaC) with CloudFormation, and optimizing build and deployment processes using Maven and Gradle. Proficient in monitoring cloud applications and ensuring performance, security, and scalability. Strong understanding of agile practices and committed to enhancing software development and deployment efficiency.

Technical Skills

AWS Services:

- **Amazon EC2** (Elastic Compute Cloud)
- **Amazon EBS** (Elastic Block Store)
- **Amazon Elastic Load Balancing** (ELB)
- **Amazon IAM** (Identity and Access Management)
- **Amazon S3** (Simple Storage Service)
- **Amazon RDS** (Relational Database Service)
- **Amazon VPC** (Virtual Private Cloud)
- **Amazon CloudWatch**
- **Amazon SNS** (Simple Notification Service)
- **Amazon SQS** (Simple Queue Service)
- **Amazon CloudFormation**
- **Amazon Elastic Kubernetes Service**
-

DevOps Tools:

- **Jenkins** (CI/CD automation)
 - **Docker** (Containerization)
 - **GitHub** (Version control and collaboration)
 - **Shell Script** (Automation and task scripting)
 - **Maven** (Build automation)
 - **Nagios** (Monitoring tools)
 - **Gradle** (Build automation)
-

Experience

Software Trainee

Valuable Resources Pvt Ltd | April 2024 – Present

DevOps Experience:

- **Managed end-to-end deployment processes** for cloud-based applications, ensuring alignment with business requirements and operational standards.
- **Designed and implemented CI/CD pipelines** using **Jenkins**, automating the build, test, and deployment processes to improve development speed and reliability.
- **Automated infrastructure provisioning and configuration** using **AWS CloudFormation** and **Shell Scripts**, reducing manual efforts and ensuring consistent environments across multiple stages.
- **Worked with GitHub** to manage source code repositories, collaborating with development teams to ensure proper version control and seamless integration of new features.
- **Monitored cloud infrastructure** with **AWS CloudWatch**, identifying performance bottlenecks and implementing corrective measures to ensure high availability.
- **Provisioned scalable compute resources** using **Amazon EC2** and **Amazon RDS**, ensuring efficient resource allocation and cost optimization.
- **Configured and maintained security policies** using **AWS IAM**, ensuring that access control and permissions were properly set for cloud resources.
- **Integrated messaging and notification services** using **Amazon SQS** and **SNS**, facilitating reliable communication between distributed systems.
- **Optimized content delivery and caching** using **Amazon CloudFront**, improving application performance for global users.
- **Implemented Elastic Load Balancing (ELB)** to ensure application high availability, distributing traffic across multiple EC2 instances.
- **Automated routine tasks** using **Shell Scripts**, reducing the time and effort required for daily administrative tasks.
- **Collaborated with cross-functional teams** to ensure that cloud infrastructure and DevOps practices were aligned with Agile methodologies and business objectives.

Education

Bachelor of Degree

B.com [computers]

Kavitha memorial degree collage

Graduation Year: 2023 | CGPA: 60%
